

# The power of UPS<sup>®</sup> and Sage Live

Let UPS and Sage Live help you scale your business and get ahead of competitors by helping you deliver a great customer experience while reducing your shipping costs.

Sage Live and UPS have built a powerful financial and shipping platform that enables you to always send the right product to the right customer at the right cost, where and when they want it. Integrate accounting with the shipping requirements of your business to focus on customers and make better financial decisions.

## Deliver amazing customer experiences

Improve customer service by fulfilling orders fast and more efficiently. Print UPS shipping labels directly from Sage Live. Keep customers satisfied by reducing potentially costly shipping errors that could result from manual order entry.

Calculate accurate shipping costs directly at the time orders are being fulfilled and add them to customer invoices so customers know exactly what they are paying and there are no surprise shipping costs later on.

## Know your bottom line

Connecting your shipping data with the rest of your financial data enables you to understand your shipping expenses in a whole new way. Control shipping expenses proactively and gain a complete understanding of customer and product profitability. Advanced analytics combined with dimensions and tags enable you to evaluate shipping expenses by customer, locations, vendors and more. Incorporate these insights as you plan your product merchandising or explore new products.

## Save time and money

Reduce the administrative time of calculating and invoicing shipping costs. Do away with costly systems that require re-keying of information and time-intensive employee training.

We offer special subscription pricing for new Sage Live customers and special shipping discounts for new and existing UPS customers.<sup>1</sup>
